Robert Adamovich
Lucent Technologies

RE: Garry Daly

The following is my personal opinion of Garry Daly as an employee.

I have worked with Garry at various times throughout my 16 year career at AT&T / Lucent Technologies. Although we didn't work closely on any particular project, I have worked with him enough to know that he is a solid worker. This is as a result of his work ethic. Garry is the type of person who takes pride in his work. When learning something new, he strives to *understand* the subject instead of taking the short cut approach of merely obtaining an answer for one day. Because Garry takes the time to learn a subject, he does not have to ask someone for the same help at a future time.

As a result of Garry's work ethic, it is no surprise that he was a "go-to" person for several areas within our company. Additionally, Garry was always willing to share his knowledge with anyone who asked. While doing so, he never made the person who asked for help feel inferior. Another strong characteristic of Garry is his adaptability at work.

As a testament to his balance in life, Garry is involved with several volunteering projects. As one example, he helped tutor underprivileged children at a school program.

In closing, anyone who is seeking a good employee should take a look at Garry Daly.

Regards,

Robert Adamovich

To whom it may concern,

It is with great pleasure that I recommend Garry Daly. I have known him for 10 years.

I had the pleasure of working with Mr. Daly at Lucent Technologies in Naperville, Il. , where he worked as an engineer in the Wireless Technical Support Center and in the First Office Application group. Mr. Daly has always displayed a very high degree of motivation, expertise, integrity, responsibility, and ambition. As an engineer with the responsibility of providing technical support to wireless customers and then with introducing new technology to the market, these qualities enabled Mr. Daly to give the highest level of support.

Mr. Daly is also a dependable team player and a natural born leader. He is constantly working to improve processes for the good of the customer. He developed a Quality Assurance program to field test new software, and designed a technical support facility to better serve our customers, to name just a few of his innovations.

Mr. Daly would be an asset to any organization, and I am happy to give him my wholehearted endorsement.

Sincerely,

Robert M. Stoltz

20 October

Mr. Robert E. Cardell
Director, SESS Switch Application Software Development Laboratory
IHP 2A430

Dear Mr. Cardwell:

I am the systems engineer who is responsible for specifying the interface between the Testing, Operations, Provisioning, Administration System (TOPAS) and the Remote Memory Administration System (RMAS). The TOPAS/RMAS interface will support automated SESS trunking and routing recent change in the 5E6 timeframe.

Over the past couple months I have been engaged in a series of discussions with Garry Daly, an MTS in your laboratory. Working with Garry has been a pleasure. Not only does he provide knowledgeable, direct answers to your questions, but he provides additional information immediately rather than allow you to discover weeks later that you need to ask another question. He is an extremely good teacher and talented co-worker. His inter-personal communications skills are as strong as his knowledge of SESS recent change, which is considerable.

In the eight years that I have worked at Bell Laboratories I have never written a letter to commend a co-worker. In those eight years, no one came close to being as helpful as Garry has been.

Sincerely,

William C. Schmoldt
MTS, Network Operations Systems Laboratory
